CARA Driver Companion — Quick Start Guide

Read the **Safety essentials** (E) before first use. Full details: see the *Full User Manual*.

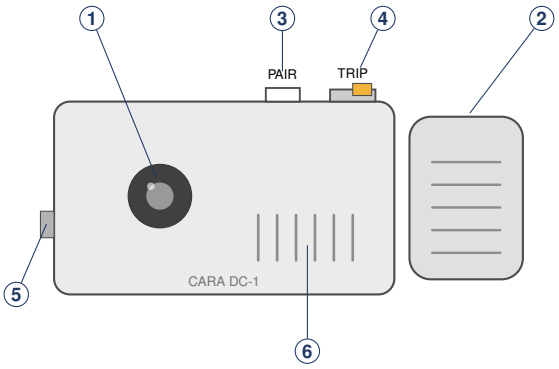

Model DC-1 | EPD/QSG/2024-28/G07 Rev 1.0
English

A What is in the box

☐ CARA DC-1 unit ×1
☐ Quick Start Guide
☐ USB power cable ×1
☐ Full User Manual

Not supplied: power bank (5 V, 2.4 A or more) or car USB charger; Android phone (8.0 or newer).

B Know your product

Front view

① Camera window ② Speaker ③ PAIR button ④ TRIP switch
⑤ Power input (micro-USB, 5 V) ⑥ Air vents — keep clear

C Set up in 4 steps

1. **Connect power.** Plug the cable into ⑤ and a power bank. Wait about 1 min for "*System ready.*"

2. **Install the app.** Install the Driver Companion app (scan the code in F), open it and allow the four permissions it asks for.

3. **Pair.** Hold ③ **PAIR** 5 s until "*Pairing mode on.*" Tap **Pair** in the app; type the code the unit speaks.

4. **Drive.** Place the unit with ① facing the road. Switch ④ **TRIP** on when you set off, off when you park: you hear the trip summary.

G Tips for best results

- Set up the app and volume **before** you drive; then leave the phone alone.
- Keep the camera window ① clean and the view through the windscreen clear: dirt, glare and wipers can hide signs.
- The phone gives the speed: keep its Location on. Overspeed warnings need a speed-limit sign read on the way.
- In the app, choose which apps are announced and turn on *Quiet mode* when you want road alerts only.

D What you will hear

"*Self test passed. System ready.*"	Ready to use
"*Pairing mode on.*"	Waiting 2 min for the app
"*Speed limit 50.*"	A road sign was read
"*Slow down. Speed limit 50.*"	You are over the limit
"*Sign alerts paused.*"	Camera blocked or dazzled
"*Warning: the . . . stopped working.*"	It restarts itself; if repeated, see manual

App status: ● connected ● searching ● disconnected

E Safety essentials

Driver aid only. It can miss or misread signs. Always obey the road signs and drive with full attention.

Do not touch the phone or the unit while driving.

Place it so it does not block your view or an airbag, and cannot slide during braking.

Use at 0–45 °C. Do not leave it in a parked car in the sun.

Use a 5 V USB source only. Do not open the case. Keep dry.

Do not put in household waste: use an e-waste collection point.

F App, help & support

Get the app **Manual & video**

Android 8.0 or newer
ahmed12-stack.github.io/driver-companion_EPD
cara.support.dc1@gmail.com

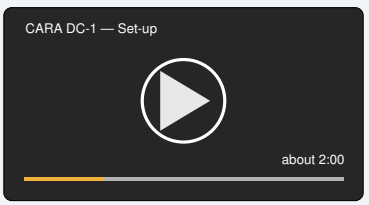

Restart: unplug, wait 10 s, plug in.

H Watch the set-up video

See it done in about 2 minutes

Point your phone camera at the code and tap the link. The video shows each step on this page: powering the unit, installing the app, pairing, placing it on the dashboard and your first drive with the trip summary.

Can't scan? Open **ahmed12-stack.github.io/driver-companion_EPD** and choose *Set up*.

Compliance: educational prototype, not certified for sale; Bluetooth Low Energy, 2.4 GHz
